

On behalf of the organizing committee, I am happy to announce the 2023 *R*-matrix Workshop on Methods and Applications, which will take place on the campus of Ohio University in Athens, OH USA from June 20 to 23, 2023. This workshop series seeks to educate young researchers about the use of the *R*-matrix technique, discuss current developments in *R*-matrix theory and its application as well as desired capabilities that are not yet available, and showcase recent accomplishments in this field. As such, abstracts covering any topic that involves *R*-matrix techniques are welcome. Abstract submission for contributed talks is now open and will close on April 20, 2023. Further information about the venue, program, accommodations, and travel information will be made available on the workshop website: <https://indico.frib.msu.edu/event/29/>.

On behalf of the organizing committee,
James deBoer
