Chair	Session	Start	Speaker	Title
Ratkiewicz	1	08:35	Vyas	Isotope Harvesting: Pushing Frontiers in Isotope Production
	1	08:50	Domnanich	Upcoming Opportunities for Scientific Applications through Isotope Harvesting at FRIB
	1	09:05	Chaple	Isotope Harvesting at FRIB for Theragnostic Applications
	1	*09:20*	*Despotopolus*	*Isotope Harvesting for Cross Section Measurements at The National Ignition Facility*
	1	09:35	Singh	Rare Isotopes for Tests of Fundamental Symmetries
		09:50		Discussion
Domnanich	2	10:20	Hoff for Kolos	CARIBU harvesting – Precision beta decay studies of 147Nd and 144Ce
	2		Hoff	Branching Ratio Measurements of the Harvested Isotopes 156Eu and 111Ag
	2	10:40	Alan	Nuclear data needs in post-detonation nuclear forensics
	2	*10:55*	*Ayllon Unzueta*	*Inelastic scattering cross section measurements for gamma ray planetary spectrometers*
	2	11:10	Apgar	Production of Radioisotopes via Proton Bombardment on Natural Antimony - Applications and Implications
		11:25		Discussion
Hughes	4	14:40	Couture	Direct Neutron Capture Measurements for Defense Applications
	4	14:55	Bucher	Nonproliferation Technology Development & Demonstration Efforts at Idaho National Lab
	4	15:10	Peters	Medical Isotopes from U and Ra using a Superconducting Electron Linac
	4	15:25	Kuvin	Direct measurements of (n,x) reactions on radioactive nuclei at LANSCE
	4	*15:40*	*Sun*	*A novel projected shell model method for nuclear level density*
		15:55		Discussion
